EDUCATION

Cornell University, College of Engineering

Ithaca, NY

Bachelor of Science in Computer Science, Minor in Artificial Intelligence (GPA: 3.363)

Expected May 2029

Brooklyn Technical High School

Brooklyn, NY

Advanced Regents Diploma

Sept. 2021 – June 2025

EXPERIENCE

Software Engineer

March 2026 – Present

CMSX

Ithaca, NY

- Contributed to CMSX, Cornell's course management platform used across 140 courses.
- Refactored and improved maintainability of the codebase, enhancing long-term scalability.
- Collaborated with others to systematically identify bugs and deploy system hotfixes.

Software Engineer, Software Subteam

March 2026 – Present

Cup Robotics

Ithaca, NY

- Built a multi-robot soccer simulation in Python with Pymunk physics, ZMQ, and behavior trees.
- Implemented a decision framework for shooting, passing, and repositioning based on robot positions.
- Designed an interactive graphical user interface (GUI) and integrated dynamic sound effects for real-time simulation feedback.

UI/UX Designer

Nov. 2025 – Present

BigRed//Hacks

Ithaca, NY

- Design and prototype BigRed//Hacks platforms such as the Hackathon site and main website in Figma.
- Assemble high-fidelity marketing materials including Instagram posts and physical flyers using Figma.
- Established a consistent digital design pattern language to elevate brand identity across media platforms.

IT Support Technician

Oct. 2023 – June 2025

Brooklyn Navy Yard

Brooklyn, NY

- Provided technical support to over 200 users, diagnosing hardware and software issues.
- Monitored and maintained infrastructure systems to ensure optimal operational performance.

PROJECTS

Battleship | OCaml, TSDL, Functional Programming

- Engineered a whimsical banana-and-raccoon themed take on Battleship using a strict functional paradigm.
- Designed dual interfaces consisting of a command-line terminal system and an animated custom GUI.
- Maintained clean code decoupling by separating user inputs, execution state, and frame rendering layout.

Critter Simulator | Java, JavaFX, Multithreading, Client-Server

- Collaborated with team of 2 to develop a simulation engine modeling programmable artificial life forms.
- Implemented a custom language parser and interpreter to execute critter real-time behaviors.
- Developed a responsive JavaFX GUI and a multithreaded client-server system supporting concurrent connections.

Little Lemon Website | React, JavaScript, HTML, CSS

- Developed "Little Lemon" a responsive restaurant website using React, JavaScript, HTML, and CSS.
- Implemented an interactive table reservation system, dynamic menus, and mobile-friendly layouts.
- Followed component-based standards to translate a real-world client project brief into reusable code blocks.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, OCaml, TypeScript, HTML/CSS

Frameworks/Libraries: React, Pandas, Pymunk, TSDL, JavaFX

Developer Tools: Git, GitHub, VSCode, IntelliJ, Docker

Other: AutoCAD, Figma, LaTeX, Microsoft Suite, Google Suite
